

YOLONG

NANO CRAFT KIT

(2HL-15HL)

YoLong Nano Brewhouse is designed and fabricated as skid and can be put into HC Containers for easy installation.

You will just connect power and water supply, then can start brewing.

Brewing

Nano Brewkit is innovated by YoLong Engineering Team and involved many brewers great minds. This system avoids many hidden dangers that might effect beer quality.

YoLong Promise

If our tanks has leakage on jacket that is hard to repair, we will re-make a new one and ship for free

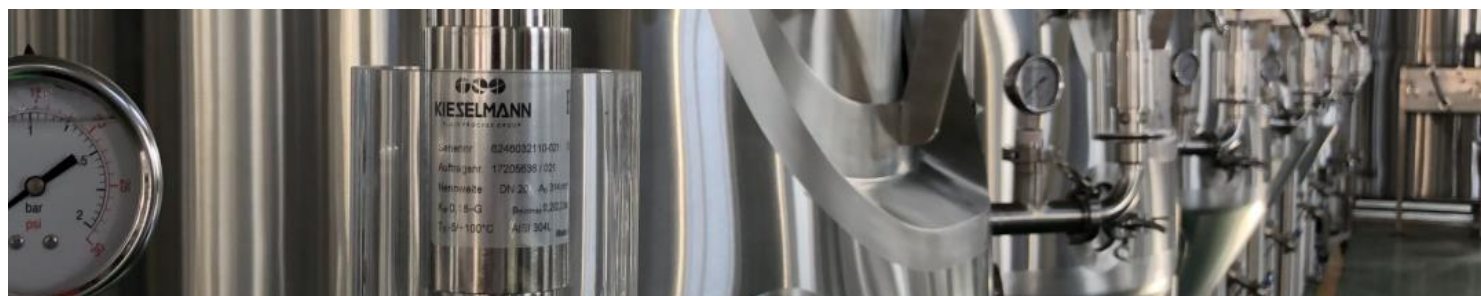

You will also have

- ⦿ 7/24 service
- ⦿ High experienced engineering team
- ⦿ Best quality and finish

Cellar System

YoLong Cellar Tanks are designed as ASME standard with certification of PED-G, AS1210, MOM etc. Strict inspection and fabricating management make sure your nice fermentation and easy to clean.

Energy & Water System

Brewpub usually want to save brewing area to have more seats in bar, so YoLong designed the stacked HLT & CLT that also is mounted HLT pump & CLT pump within the edge of tank.

- The slightly sloping bottom of HLT can drain out all liquid when doing CIP
- There is 100mm insulation between HLT and CLT to avoid heat exchanging.

Ancillary Equipment

Your brewhouse needs reliable ancillary equipment to ensure smooth operation and quality beer.

- HopStorm

YT-HS10 answers your dry hopping needs, utilizing a double helix to create a burst of inner turbulence that literally dissolves the hop pellets as the beer circulates through the vessel.

- Yeast Brink

Yeast Brink is modified from keg to harvest yeast from fermenter to be stored, and pitched again into a new batch of beer.

- Keg Washers

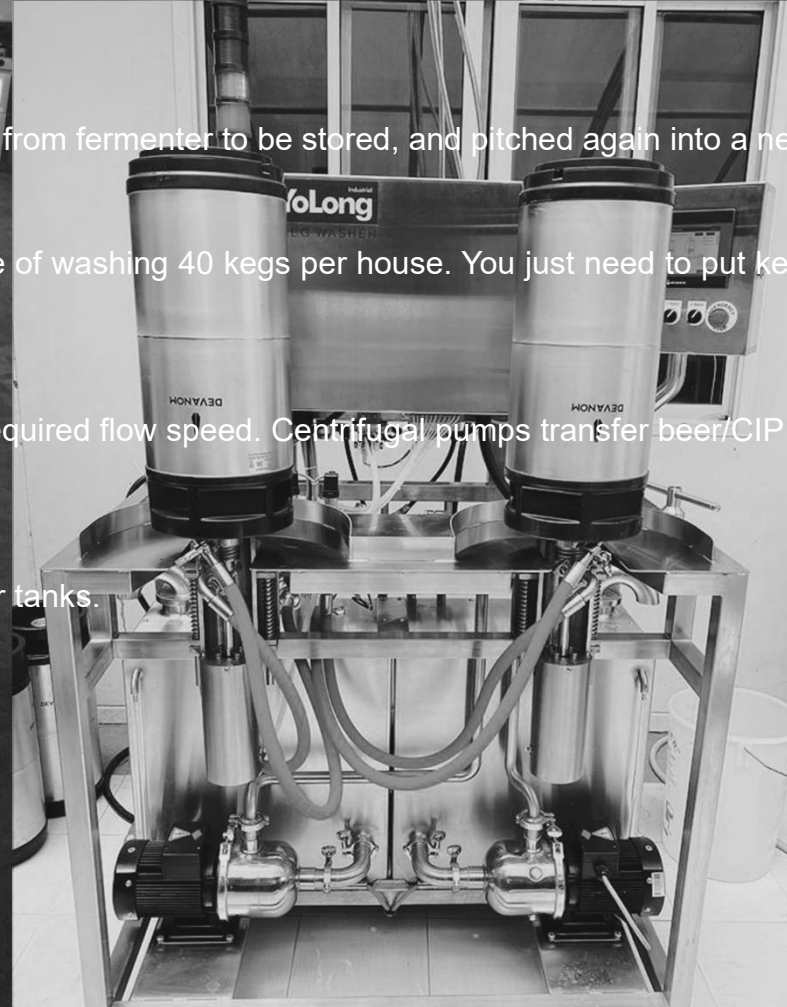

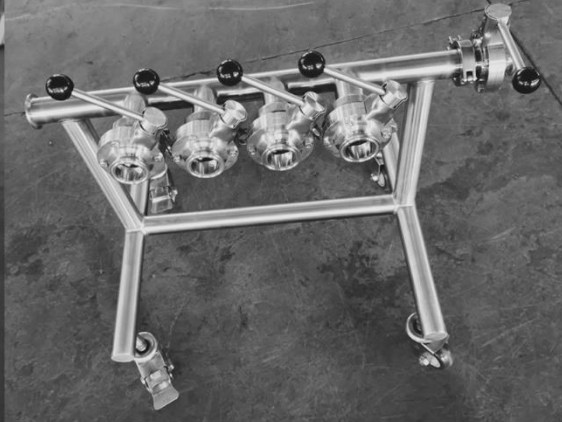

WG30 is a two station semi automatic kit capable of washing 40 kegs per house. You just need to put kegs on the table, the rest of operation the PLC can finish.

- Trolley pumps

Invertek VSD is mounted on trolley to have the required flow speed. Centrifugal pumps transfer beer/CIP and low speed rotor pump is better for transferring yeast.

- Manifold

Manifold is much helpful when fill kegs from cellar tanks.
